Figure search by text in large scale digital document collections.

Image-based locating and guiding for unmanned aerial vehicles using scale invariant feature transform, speeded-up robust features, and oriented fast and rotated brief algorithms.

Event-Based Microservices With Apache Kafka Streams: A Real-Time Vehicle Detection System Based on Type, Color, and Speed Attributes.

Multimodal anomaly detection on spatio-temporal logistic datastream with open anomaly detection architecture.

Guiding Visually Impaired People to Find an Object by Using Image to Speech over the Smart Phone Cameras.

Performance evaluation of support vector machine and convolutional neural network algorithms in real-time vehicle type and color classification.

Performance Evaluation of Support Vector Machine and Convolutional Neural Network Algorithms in Real-Time Vehicle Type Classification.

DIFET: Distributed Feature Extraction Tool For High Spatial Resolution Remote Sensing Images.

Sleep Stage Classification: Scalability Evaluations of Distributed Approaches.

Modeling and querying trajectories using Neo4j spatial and TimeTree for carpool matching.

Evaluation of different algorithms for measuring the similarities of trajectory datasets.

Evaluation of Real-Time Performance for BGSLibrary Algorithms: A Case Study on Traffic Surveillance Video.

Analyzing Big Security Logs in Cluster with Apache Spark.

A Novel Signaling Protocol (ARCSPXP): Case Study on Synchronization of Educational Data.

Akademik Çalışmalara Hakem Ataması için Büyük Veri Altyapısı.

MapReduce based scalable range query architecture for big spatial data.

Tracking a single node's availability for communication by means of observing local system resources.

A Comparative Study of Signaling Protocols for Data Management and Synchronization in Fatih Project with School Level Cloud Proxy Server Deployment.

A Method for Localization of Computational Node and Proxy Server in Educational Data Synchronization.

Chaining Data and Visualization Web Services for Decision Making in Information Systems.

Performance Evaluations of Vector-Raster Satellite Image Transfers through Web Services.

Hadoop plugin for distributed and parallel image processing.

A Service Oriented Framework for Animating Big Spatiotemporal Datasets.
